

COMPACT AD

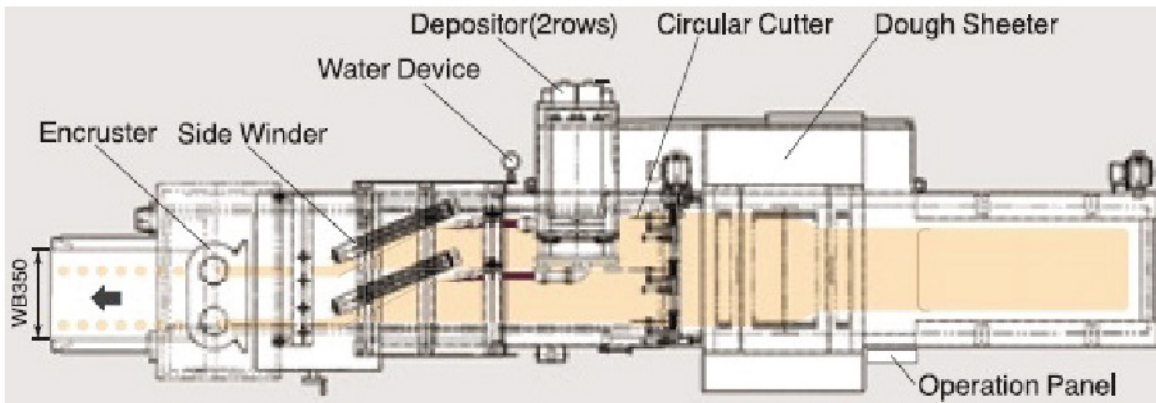

**Compact, yet very versatile with a high output.
The Champion of Filled Bread Production!**

A wide variety of high quality breads can be produced from the dough sheet with the same quality as hand made.

A wide variety of high quality breads can be produced from the dough sheet with the same quality as hand made.

- The new "Compact AD" is a smaller version of the "AD Line." It stretches and rolls up the dough sheet with filling and produces filled products automatically.
- Whether you are producing filled products such as red bean bun, cream bread, Chinese buns to long products, roll bread and baguettes, a wide range of breads can be easily produced at the greatest quality using the Stress Free System.
- Although compact, this machine's maximum production speed is 6,000 pieces per hour.

The Color Touch Screen is "Easy to see, Easy to use!"

The Product Memory Unit (P.M.U) stores and recalls the production data.

Flour Duster (Optional)

The Flour Duster can be attached to the line to dust flour consistently onto the conveyor belt or dough sheet.

Dough Supply	Hand booking
Sheeter Section	Infeed thickness : less than 30mm Outfeed thickness : 5mm (Depending on dough condition)
Forming Section	Usable dough width : 400mm(max) Circular Cutter : 3pcs(for 2rows) Depositor type : Screw + Flow controller (Continuous extrusion)
Encruster	Maximum speed : 50rpm/row Maximum production rate : 6000pcs/h (= 2rows x 50rpm x 60min.) Cutting length : Up to 300mm

*** The figures vary depends on the dough condition and characteristics.
